TARGUS WIRELESS STOW-N-GO™ KEYPAD

Introduction

Congratulations on your purchase of the Targus WirelessStow-N-Go™ Keypad. The keypad is designed with a built-in cavity to store the USB receiver, eliminating the potential misplacement of the receiver and to provide ease of traveling with the keypad.

Package Contents

In addition to this user guide, this package contains:

- Wireless keypad
- USB receiver
- USB extension cable
- 1 AA battery
- Carrying pouch

System Requirements

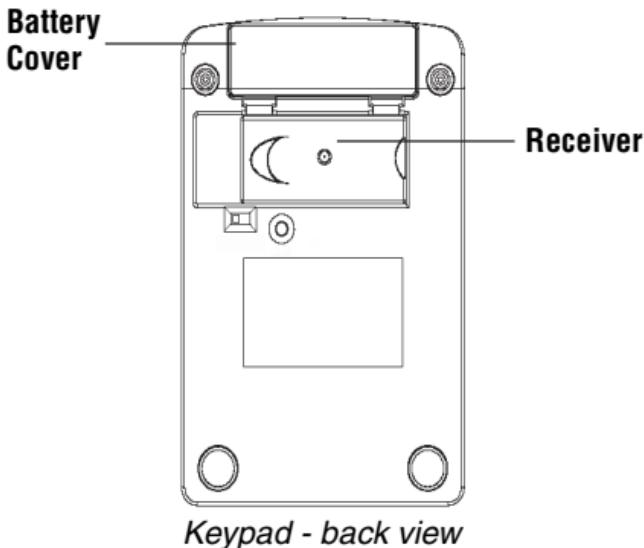

Hardware

- PC with an Intel® Pentium® processor or equivalent
- USB 1.1 or 2.0 interface

Operating System

- Windows® 98SE/Me/2000/XP
- Windows Vista™

Installing the Battery

1. Remove the battery cover from the back of the keypad.
2. Insert the supplied battery, making sure that the positive (+) and negative (-) ends match the polarity indicators inside the battery housing.

 NOTE: WHEN REPLACING THE BATTERY, YOU MAY USE ALKALINE OR OTHER HEAVY-DUTY NIMH BATTERY.

3. Slide the battery cover back into position until it "clicks" firmly into place.

Connecting the Receiver and Installing the Default Drivers

To connect the receiver:

1. Remove the receiver from the back of the keypad.
2. Plug the USB receiver into an available USB port on your computer.

For **Windows® 98SE**, follow any on-screen instructions to complete the default driver installation.

For **Windows® Me/2000/XP/Vista**, the “Found NewHardware” or “Auto-detect of a HID device” message will appear to indicate the installation of the default driver.

NOTE: YOU MAY NEED TO ESTABLISH A COMMUNICATION LINK BETWEEN THE KEYPAD AND THE RECEIVER. SEE “ESTABLISHING A COMMUNICATIONS LINK”.

Turning the Keypad On and Off

1. To power on the battery, use the on/off switch located on the back of the keypad.
2. To power off the battery, use the on/off switch located on the back of the keypad. This feature should be used when traveling to prevent power loss.
3. To turn on the keypad, press the NumLock key, located directly above the number seven key.
4. The keypad goes into sleep mode after 4 minutes of non-operation. To wake the keypad, press the NumLock key.

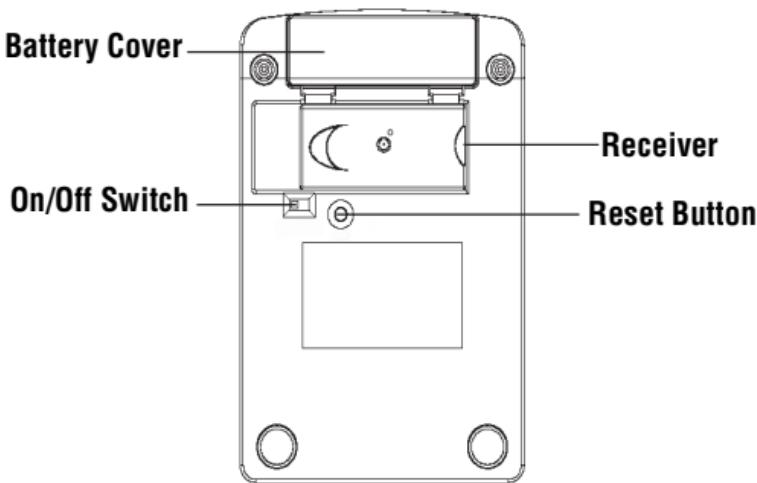

Establishing a Communications Link

After your computer detects the USB receiver and the default driver software is installed, you may need to establish a communications link between the receiver and the keypad before you can use it.

1. Plug the receiver into your computer's USB port and turn on the keypad.

NOTE: MAKE SURE THAT YOUR COMPUTER AND KEYPAD ARE TURNED ON AND YOUR COMPUTER HAS DETECTED THE USB RECEIVER BEFORE YOU ESTABLISH A COMMUNICATIONS LINK.

The LED on the receiver will flash for 30 seconds to indicate ID search mode.

2. During this time, press and release the reset button on the back of the keypad.

When a communications link is established, the LED on the receiver will stop flashing.

You are now ready to use the keypad.

Using the Keypad

Definition of the Keys:

.	NumLock on - inserts a decimal point NumLock off - deletes a number
0 Ins	NumLock on - enters "0" on the display NumLock off - emulates the Insert key
00 ,	NumLock on - enters "00" NumLock off - inserts a comma (,)
1 End	NumLock on - enters "1" on the display NumLock off - emulates the End key
2 ↓	NumLock on - enters "2" on the display NumLock off - moves the cursor down one line of text
3 PgDn	NumLock on - enters "3" on the display NumLock off - emulates the Page Down key
4 ←	NumLock on - enters "4" on the display NumLock off - moves one character to the left of the cursor position
5	NumLock on - enters "5" on the display NumLock off - No function

6 →	NumLock on - enters "6" on the display NumLock off - moves one character to the right of the cursor position
7 Home	NumLock on - enters "7" on the display NumLock off - emulates the Home key
8 ↑	NumLock on - enters "8" on the display NumLock off - moves the cursor up one line of text
9 PgUp	NumLock on - enters "9" on the display NumLock off - emulates the Page Up key
+	NumLock on
=	NumLock off

NOTE: THE NUMLOCK KEY ON YOUR COMPUTER WILL NOT AFFECT THE NUMLOCK STATUS OF THE KEYPAD.

Operating Hints

For optimal performance and RF reception:

- Place the receiver at least 8 inches (20 cm) away from all electrical devices, such as your monitor, speakers or external storage devices.
- If necessary, use the supplied USB extension cable to keep the receiver away from the computer. Plug the receiver into the extension cable, and the extension cable to the computer.

Power Management

- To extend the life of your batteries, power off the battery with the on/off switch located on the back of the keypad while traveling or when you're not using it.
- The keypad's power saving mode feature activates after 4 minutes of non-operation. To activate the keypad, press the NumLock key.

Troubleshooting

What do I do if the keypad does not work?

- Make sure that the polarity of the batteries is correct. The positive (+) and negative (-) ends of each battery must match the positive (+) and negative (-) connections in the battery housing.
- Check that the receiver's USB connector is firmly attached to the USB port on your computer.
- Verify that the device drivers are installed.
- Make sure you have established a communication link. See "Establishing a Communications Link".

When I use the keypad, other wireless devices work more slowly or fail temporarily – what should I do?

- The keypad may cause interference with any cordless, radio-based device such as a telephone, baby monitor, or toy. To reduce interference, move the keypad's receiver and the base unit of the affected device as far away from each other as possible.

What do I do if the response time of the keypad is slow or it intermittently stops working?

Try one or more of the following:

- Increase the distance between the receiver and the rest of your computer equipment.

- Increase the distance between the receiver and the base units of other wireless devices.
- Turn off any wireless devices and their base units that are near the keypad's receiver.
- If you are using the keypad on a metal surface, move it and the receiver to a non-metal surface. Metals, such as iron, aluminum or copper, shield the radio frequency transmission and may slow down the keypad's response time or cause the keypad to fail temporarily.
- Replace the batteries.

Product Registration

Targus recommends that you register your Targus accessory shortly after purchasing it. Go to:

<http://www.targus.com/registration.asp>. You will need to provide your full name, email address, phone number, and company information (if applicable).

Warranty

Targus warrants this product to be free from defects in materials and workmanship for one year. If your Targus accessory is found to be defective within that time, we will promptly repair or replace it. This warranty does not cover accidental damage, wear and tear, or consequential or incidental loss. Under no conditions is Targus liable for loss of, or damage to a devices nor loss of, or damage to, programs, records, or data; nor any consequential or incidental damages, even if Targus has been informed of their possibility. This warranty does not affect your statutory rights.

Regulatory Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Statement Tested to Comply

This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna;
- Increase the separation between the equipment and receiver;
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected;
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not authorized by the party responsible for compliance could void the user's authority to operate this product.

Declaration of Conformity

Hereby, Targus, declares that this device is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.
